

Welcome to the Developmental Delay Rehabilitation Services, Inc. - where children and families come first! Our objective is to assist local children to achieve their full potential regardless of the obstacles they may face on their road to success. DDRS is approved by the New York State Department of Health as an Early Intervention Evaluation and Service provider. We currently hold contracts in Westchester, Rockland and Orange Counties.

DDRS is also approved by the New State Education Department, providing services to children ages 3 - 5 under Section 4410 of the Commissioner of Education's regulations for children with handicapping conditions. We currently have contracts for services with the above counties, and the City of New York, through the New York City Board of Education.

The services are offered by highly qualified staff members including fully licensed Special Ed, Master's and doctoral level teachers, speech therapists, occupational therapists, physical therapists, certified social workers and psychologists. In addition, we are contracted with local pediatricians, physicians, neurologists and community based psychologists workers to provide family support for children with special needs.
